**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Daiber.

Daiber teaches in the figures a convertible carrying case (10), flat bottom section four sides and top section when case is opened (fig.1) and a plurality of toy replica circuit training stations (15,16).

Regarding claim 7, Daiber further teaches a top section miniature wall (16, fig.5).

Regarding claim 10, Daiber further teaches that the plurality of stations is removable and reattachable (fig.5, par. 2).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4, 9, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daiber.

Art Unit: 3712

Daiber teaches most of the elements of the claimed invention. However, Daiber fails to teach compact disc player and computer processor to play recorded music, pliable plastic training stations, and the training stations magnetically attached to the carrying case. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a compact disc player and a computer processor to play music since it was known in that that music is used with and in toys for creating excitement. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the training stations of pliable plastic since it was known in the art that toys are made of pliable plastic to prevent injury to a child(ren) when playing. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the training stations magnetically attach to the carrying case since it was known in the art that magnets are used to attach toys to other toys.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daiber in view of Meyer et al.

Daiber teaches most of the elements of the claimed invention except for a barbell and step benches. Meyer teaches an accessory set of gymnasium equipment for use with a figure toy. Meyer et al teaches a barbell (154) and step benches (110) used in the set of gymnasium equipment. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a barbell (154) and step benches (110) as taught by Meyer with the facility of Daiber for the purpose of displaying a simulation of different equipment in use, and especially in view of Daiber

Art Unit: 3712

teachings that the invention is designed to provide a portable toy storage container which can be used to create a wide variety of play scenarios (col. 6, lines 7-9).

Claims 8 and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daiber in view of Chase.

Daiber teaches most of the elements of the claimed invention except for a removable drawer and a handle attached to the case. Chase teaches in the figures a collapsible storage play structure having a removable drawer (14) and handle (84). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a removable drawer and handle as taught by Chase to the case of Daiber for the purpose of storing the dolls and carrying the case easily.

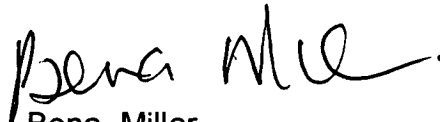

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bender teaches a portable and storable doll. Allen et al teaches a figure toy play kit. Coleman et al teaches a dollhouse within a dollhouse. Lish teaches a soft foldable toy. Taylor teaches a portable puppet theater systems.
